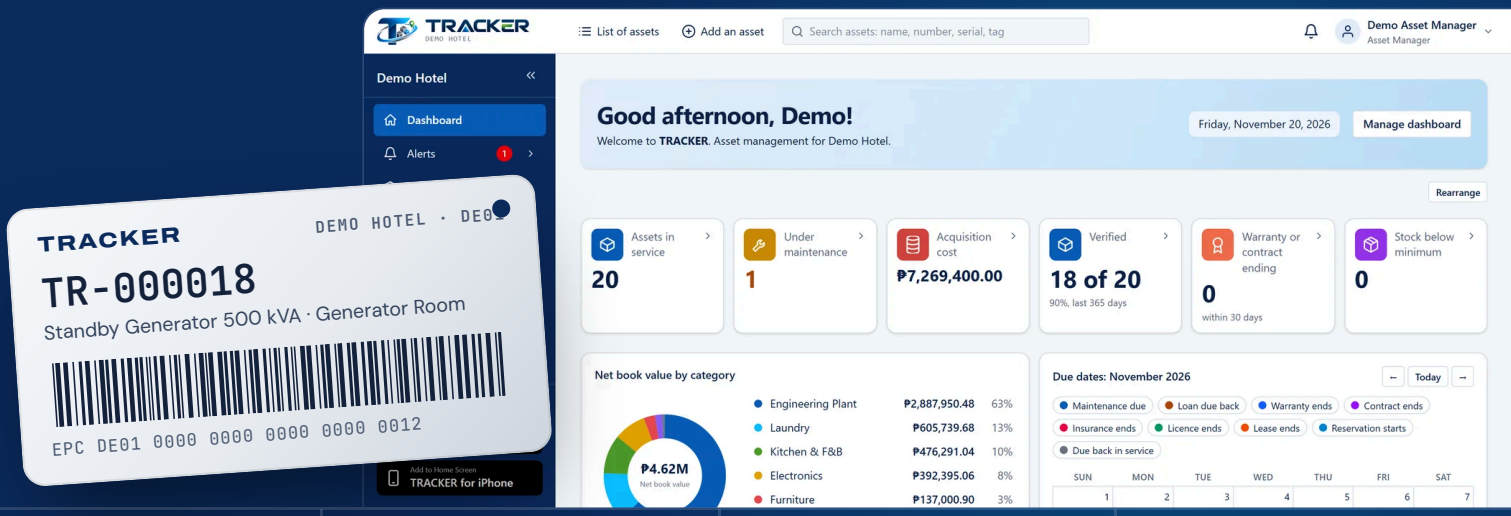
TRACKER

FIXED ASSET MANAGEMENT
BY AUXILIARIS NETWORK

FOR HOTELS, RESORTS AND MULTI-SITE OPERATORS · PHILIPPINES

Every asset tagged, counted, located and valued.

Put a tag on every item, count rooms with a phone, see book values update every month, and keep an audit trail that nobody can quietly change. One system for finance, engineering and operations.



Phone counts

Android app and iPhone web app, works offline

4 methods

of depreciation, worked out every month

Checked nightly

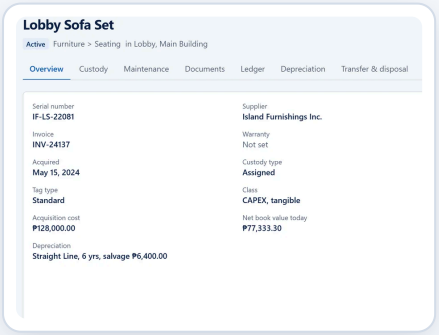
tamper-evident audit ledger

Backed up

encrypted every night, copy kept off the server

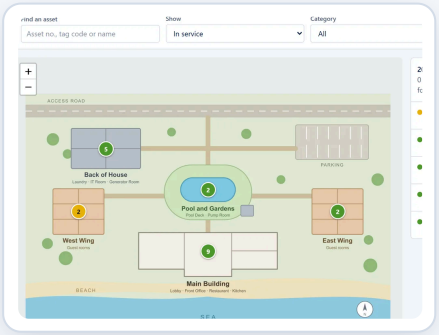
THE REGISTER

One record per asset, on the map and on the books



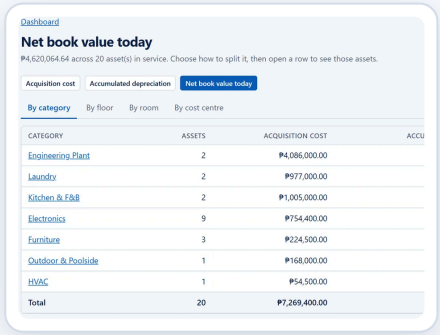
Everything about an asset

Serial, supplier, invoice, warranty, photos and documents, and who holds it now, with every hand-over on record. Found in seconds by search or by scanning its label.



The whole property at a glance

Pin buildings and rooms on your own site plans. Each pin shows its asset count and the worst problem there: fine, under maintenance or missing.

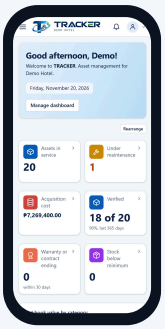


Book values, worked out monthly

Straight line, double declining, 150% declining or sum-of-the-years' digits, in pesos to the centavo. Month-end and forecast reports to PDF or CSV.

COUNTING

Count with the phone in your pocket



Room count: Main Kitchen	3 of 3
Combi Oven 10-tray TR-000007	Found
Walk-in Chiller TR-000008	Found
Smart TV 55 inch TR-000016	Not seen 130 days

Staff walk a room, scan what is there, and TRACKER compares it with what should be there. Results reach the register as they finish, even if the signal drops.

- [ ] Android app, and a home-screen web app for iPhone
- [ ] QR and barcode labels printed from TRACKER
- [ ] Tag codes ready for UHF RFID; ask us about handheld readers

ALSO INCLUDED

The rest of the job, in the same system

Maintenance
Work orders, planned maintenance with checklists, parts and labour.

Approvals
Transfers and disposals approved by role, department head and value.

Stock and spares
Receive, issue, move and count spares, with low-stock alerts.

Reports
Ready-made and custom reports with your logo, emailed on a schedule.

Many properties
Several properties and sites, each person limited to their own.

API and webhooks
A documented API and signed webhooks for accounting, PMS or help desk.

Records for auditors
A tamper-evident ledger, checked every night, and a two-year activity log.

Secure sign-in
Four roles, with an authenticator code required for administrators.

BUILT FOR HOTELS AND RESORTS

Made around how a property actually runs

Guest loans
Lend hair dryers, cots and kayaks against a room and reservation, with due-back reminders.

Checkout inspections
Damage becomes a work order, missing items a charge note.

Out of order
Rooms and assets out of order show on the dashboard and map until they are back.

Shift hand-overs
Radios and keys handed from shift to shift, acknowledged by the person taking over.

PACKAGES

Every package is the full system. The difference is the tags.

STARTER
Print your own
QR or barcode labels printed from TRACKER on your own label sheets.

Pricing on request

STANDARD
Printed tags supplied
Durable printed tags in your asset numbering, ready to attach.

Pricing on request

RFID
No line of sight needed
UHF RFID tags, including for metal; reader options discussed with you.

Pricing on request

Screens show sample data from the demo hotel, which returns to its starting data every night at 3:00 AM Manila time.
